

## **Pro-active Maintenance** for your vital communications system

**minimise downtime - maximise user satisfaction - reduce business risk**

Your communications system is a vital business tool that needs to be working and fully available all the time. What would it cost you in terms of lost business if your system stopped working, even for a short time? What would be the effect on your company image and customer satisfaction? Clearly anything you can do to reduce the likelihood of this occurring has to be a sound business investment.

Our pro-active maintenance service will monitor the health of your system, day and night, all year round. It will raise an alarm if a problem starts to occur. Armed with this information we can remotely access your system and minimise the effect. Very often we will be able to clear the problem before you, or more importantly your users and customers, have noticed it. Should it be necessary to visit site we can schedule an engineer to arrive with the necessary replacement spares at the earliest possible opportunity.

Let our service take the strain. Our pro-active maintenance service will reduce your business risk and give you additional peace of mind.

Your systems will run more smoothly, you will have happier users and a healthier, better performing network. AMS from Data Track, a sound investment.
